

# Updates

While we understand that many pilots are currently unable to fly due to COVID-19 restrictions we aim to continue to release safety education and Due knowledge of the area awareness material to support the GA community with the future return to flying and continue to help promote longer-term safety awareness. To meet that aim we have launched a new series of narratives focusing on infringement occurrences.

Other narratives in this series can be found on the [Infringement occurrences](https://airspace-safety.com/infringement-occurrences/) (<https://airspace-safety.com/infringement-occurrences/>) page.

## Infringement of Class D – Birmingham Control Area
